## SECTION 4. FIRS AID MEASURES

### 4.1 DESCRIPTION OF FIRS AID MEASURES

**By eye contact** : In case of irritation caused by the fumes, rinse immediately with plenty of water, also under the eyelids. If symptoms persist, contact your doctor.

**By skin contact** : May produce an allergic reaction on the skin. In case of contact, it is recommended to clean the affected area with water by dragging and with neutral soap. In case of skin changes (itching, redness, rashes, blisters ...), go to a doctor with this Safety Data Sheet.

**By inhalation** : It is a product not classified as dangerous by inhalation, however, in case of symptoms of poisoning it is recommended to remove the affected person from the place of exposure, supply them with clean air and keep them at rest. Seek medical attention if symptoms persist.

**By ingestion**

: Do not induce vomiting, if it occurs keep the head tilted forward to avoid aspiration. Keep the patient at rest. Rinse the mouth and throat, as there is a possibility that they have been affected on ingestion.

**4.2 MOST IMPORTANT SYMPTOMS AND EFFECTS, ACUTE AND DELAYED**

Acute and delayed effects are listed in Sections 2 and 11.

**4.3 INDICATIONS FOR MEDICAL ATTENTION AND SPECIAL TREATMENTS THAT SHOULD BE GIVEN IMMEDIATELY**

No hay information available

**SECTION 5. FIREFIGHTING MEASURES**

**5.1 EXTINGUISHING MEDIA**

**Suitable extinguishing media**

: Non-flammable product under normal conditions of storage, handling, and use, containing flammable substances. In case of ignition because of handling, storage or improper use, preferably use multipurpose powder extinguishers (ABC powder), in accordance with the Regulation of fire protection installations (R.D. 513/2017 and subsequent modifications).

**Unsuitable extinguishing media**

: It is recommended not to use full jet water as an extinguishing agent.

**5.2 SPECIAL HAZARDS ARISING FORM THE SUBSTANCE OR MIXTURE**

Because of combustion or thermal decomposition, reaction by-products are generated that can be highly toxic and, consequently, can present a high risk to health.

**5.3 ADVICE FOR FIREFIGHTER**

**Instructions**

: No fighting instruction is required.

**Special protective equipment for firefighters**

: As in any fire, wear MSHA / NIOSH pressure-demand self-contained breathing apparatus (approved or equivalent) and all necessary protective equipment.

**SECTION 6. ACCIDENTAL RELEASE MEASURES**

**6.1 PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT AND EMERGENCY PROCEDURES**

**For personnel who are not part of the emergency services**

: Isolate leaks if it does not pose an additional risk to persons performing this function. Evacuate the area and keep unprotected people away. In the event of potential contact with the spilled product, the use of personal protection elements is mandatory (see SECTION 8). Avoid as a priority the formation of flammable vapor-air mixtures, either through ventilation or the use of an inerting agent. Remove any source of ignition. Eliminate electrostatic charges by interconnecting all conductive surfaces on which static electricity can form, while the assembly is grounded.

**For emergency personnel**

: Wear with appropriate personal protective equipment (see SECTION 8).

**6.2 ENVIRONMENTAL PRECAUTIONS**

Avoid at all costs any type of spillage into the aquatic environment. Adequately contain the absorbed / collected product in hermetically sealable containers. Notify the competent authority in the event of exposure to the public or the environment.

**6.3 METHODS AND MATERIAL FOR CONTAINMENT AND CLEANING**

It is recommended:

Absorb spillage with sand or inert absorbent and move to a safe place. Do not absorb in sawdust or other combustible absorbents. For any consideration regarding disposal, consult SECTION 13.

## SECTION 7. HANDLING AND STORAGE

### 7.1 PRECAUTIONS FOR SAFE HANDLING

- General precautions** : Comply with current legislation on the prevention of occupational hazards. Keep containers tightly closed. Control spills and residues, eliminating them with safe methods (SECTION 6). Avoid free spillage from container. Maintain order and cleanliness where dangerous products are handled.
- Technical recommendations for the prevention of fires and explosions** : Avoid evaporation of the product as it contains flammable substances, which can form flammable vapor / air mixtures in the presence of ignition sources. Control ignition sources (mobile phones, sparks ...) and transfer at slow speeds to avoid the generation of electrostatic charges. Consult SECTION 10 on conditions and materials to avoid.
- Technical recommendations to prevent ergonomic and toxicological hazards** : For exposure control consult SECTION 8. Do not eat, drink, or smoke in work areas; wash hands after each use and remove contaminated clothing and protective equipment before entering eating areas.
- Technical recommendations to prevent environmental risks** : Due to the danger of this product for the environment, it is recommended to handle it within an area that has pollution control barriers in case of spillage, as well as to have absorbent material in the vicinity of it.

### 7.2 CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATIBILITIES

- Requirements for the warehouse and containers** : Store in a dry place, protect from sunlight, store between 5°C and 30°C.
- Rules for joint storage** : Not necessary.
- Additional information on storage conditions** : Store in tightly closed containers in a cool, dry place.
